MATERIAL FOR CABINET BODY PRODUCTION

Material for door and cabinet body production, along with the fittings? There's nothing easier than ordering both from us.

COMPLETE CABINET BODIES

You got a great deal, but no time and space in the workshop or are there other obstacles? Don't lose hope, we offer you our space, power tools and time, and we will make the necessary cabinet bodies for you!

TECHNICAL SUPPORT

Not sure about the fittings and the choice of assembly? Call +420 596 223 455 or email help@demos-trade.com and we will be happy to help you.

PORTAL

A customer portal for on-line shopping, order overview, placing custom production orders and checking their status, information about stock and your prices and much more in one place.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands.

What is in this chapter?

A brief introduction of manufacturers, products or important values from this chapter.

In this chapter you will find cutlery trays from **Strong, Kesseböhmer and Vibo**. They are sorted **by brand** (see above) and by product range (larder units, bottom cabinet equipment, etc.). Inside the brand, they are always sorted **by the size of the cabinet body they are intended for**.

Explanations of some terms

Larder unit

Full extension slide frame (some models can still be rotated when extended) equipped with baskets for tall cabinet body (up to 2,250 mm) up to 600 mm wide for storing dry food, canned food and beverages.

Corner solutions

Pull-out equipment for corners in L or U kitchens, making this otherwise difficult to access space more accessible.

Baskets with side runner system

Baskets in the largest extent for bottom cabinets, which are fixed on their side. The most common use is for narrow cabinets: 150 or 200 mm, in which the basket would be unstable with a different attachment.

Baskets with bottom runner system

Again, baskets for the bottom cabinets, this time with the slide fixed into the base of the cabinet. This makes the shelves easily accessible from more sides than with side mounting.

Hinge systems

It is particularly suitable for small kitchens, where it adds extra storage space, for example between the top and bottom cabinets.

Bar consoles (supports)

The name clearly indicates that these are metal supports for the so-called bar shelves where the kitchen meets the rest of the room. With their help, you can easily create a pleasant bar for sitting with... anyone.

Kesseböhmer

Arena Pure

Baskets with sides and bottom made of sheet metal match the trend of thin sides in drawers, while not allowing liquid or bulk material to leak out.

Arena Style

The classic wire has been replaced by a flat one and the base of the baskets is, in this design, made of particle board with a white surface treatment and AntiSlip coating.

Arena Classic

This type of baskets is made of classic wire, but the base of the baskets is made of particle board with a white surface treatment and AntiSlip coating.

Vibo

Galaxy

The wire sides have been replaced by an oval chrome profile and the base is made of particle board with a white or grey surface treatment.

Essence

In the case of Essence, we can't even talk about wire systems anymore, the wire sides have been replaced by glass and the base is made of grey particle board. Great and functional design for the modern kitchen.

What are the TOP products?

We have prepared a selection of the most interesting things you will find in the catalogue.

Complete equipment under 1 code

Ordering fittings for a larger unit or corner solution is now very easy. Just find the brand, design and dimensions you want and then enter 1 single code in your order. It doesn't get any easier than that.

More news in the chapter

Kesseböhmer Arena Pure

Under the PURE moniker is the new design of the Dispensa pull-out larger baskets, Comfort II pull-out frames, the revolutionary LeMans corner solution and other products. The basket is completely enclosed and resembles the design of slides with thin sides (StrongMax, Legrabox or AvanTech YOU). It complements them perfectly, plus it prevents anything from leaking or spilling out of the basket!

5.18

kitchen wire systems

05

05

iMove help

One of today's trends is cabinets that extend to the ceiling. But not everyone can reach them. The solution is the iMove shelves, which can be easily pulled down (similar to pull down wardrobe rails), you can comfortably use them and then put the shelves back. In the same way, it is perfect for people with disabilities that do not allow them to stand.

5.45

Kesseböhmer TurnMotion II

Fixed shelves have one big disadvantage and this is especially true for those in the top cabinets. Whatever's in the back is hard to get to. The TurnMotion II shelves solve this problem perfectly. They have no back sides, they can be rotated so what you need is always in front and close at hand.

5.46

VIBO Fly Box

The mechanisms for corner cabinets had one downside until recently. They couldn't hold small items. The Fly Box from VIBO does not have this limitation. The front and rear baskets are fitted with a solid base and the rear baskets even with solid sides. Nothing there has a chance of falling out or falling through. The design also fits perfectly with slides with thin hollow sides.

5.59

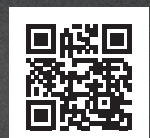

Essence of beauty

Glass sides, anthracite base and accessories – these are the Essence design baskets from VIBO. You can find them in the larder unit or bottom kitchen cabinets. Every time you open the cabinet you'll be blown away. Not only is it beautiful, but it's also practical, you can see through the full all-glass sides and nothing slips out.

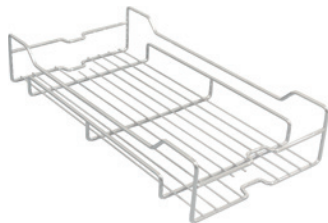

5.51
