What is in this chapter?

A brief introduction to manufacturers, products or important values from this chapter.

In this chapter you will find **Strong, Franke, Blanco and Grohe** kitchen sinks, **Strong, Franke, Blanco and Grohe** kitchen taps, **Franke** kitchen hoods and **EcoMaster** waste disposers sorted by the material they are made of – ceramic, granite, stainless steel. In the contents, they are sorted by options with or without a draining board and by installation type (inset, undermount).

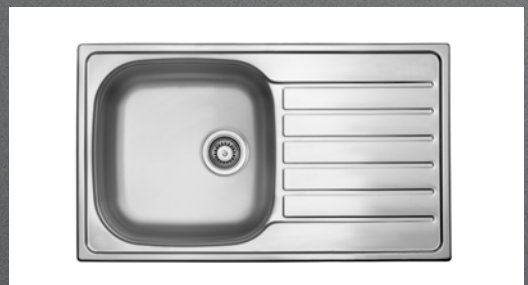

StrongSinks S3

2 types of quality Strong kitchen sinks made of granite and stainless steel. The kitchen sinks are manufactured to enhance the aesthetic aspect of the kitchen.

StrongSinks S1

The basic range of stainless steel kitchen sinks combining sufficient quality with an excellent price.

Explanations of some terms

Franke Fragranite

It is one of the toughest materials used for making kitchen sinks. It is made of 80% crushed silica sand and binder. The kitchen sinks have a very pleasant and warm surface to the touch.

Franke Tectonite

Tectonite is a range of kitchen sinks made from a fully synthetic material that mimics granite kitchen sinks, at a better price, of course.

Blanco ceramic kitchen sinks

Ceramic kitchen sinks have many advantages, the biggest of which is that they can withstand really high temperatures and, unlike granite kitchen sinks, can be almost any shape and shade.

Blanco Silgranit

As with Franke, Blanco sinks are made up of 80% of the hardest parts of granite. Their long service life means your long satisfaction.

What are the TOP products?

We have prepared a selection of the most interesting things you will find in the catalogue.

StrongSinks S1 and S3

15.9

It is a new, complete line of kitchen sinks and kitchen taps under the **Strong** brand. You will find granite and stainless steel kitchen sinks (pressed and welded) including optional accessories and matching kitchen taps. All in good quality with a 5 year warranty and an even better price.

Are you interested in a minimalist solution?

More news in the chapter

MRG 610-54 FTL

The new range of Fragranite kitchen sinks without draining board, MRG 610 without draining board, will suit any kitchen that needs a small kitchen sink or can't fit a large one. The colour options onyx, black matt, grey stone, icy white and cashmere find their places everywhere.

15.32

Blanco – ceramic kitchen sinks

Safe for food contact and hygienically clean. Solid, scratch-resistant surface. Hygienic: closed and sealed. Easy maintenance: you don't need much. Temperature and light resistant. A selection of great features of these kitchen sinks.

15.65

Concealed in the worktop

FDW 908 IB XS is the name of the kitchen hood concealed under the worktop. This makes it completely unobtrusive in the kitchen without losing any performance. The kitchen hood motor can be positioned on both sides and can be rotated at 90 degree intervals. The display will show the filter saturation... In short, it offers all the benefits and life certainties.

15.62

15

Grohe Blue – almost like a spring water

In addition to regular mains water, these GROHE Blue Pure kitchen taps provide clean, fresh table water straight from the tap. The reliable GROHE Blue activated carbon filter removes unwanted substances that adversely affect its smell and taste. GROHE Pure kitchen taps also have all the functionality of standard kitchen taps.

External exhaust

- Higher performance – the odour filter reduces the performance of the recirculation hood by up to 20%.
- Greater safety – leads all fumes outside the kitchen.
- Quieter operation.
- Cheaper operation – no need to change odour filters.
- Backdraft shutter not included

Exchange of odour filter
with activated charcoal

Filter cleaning

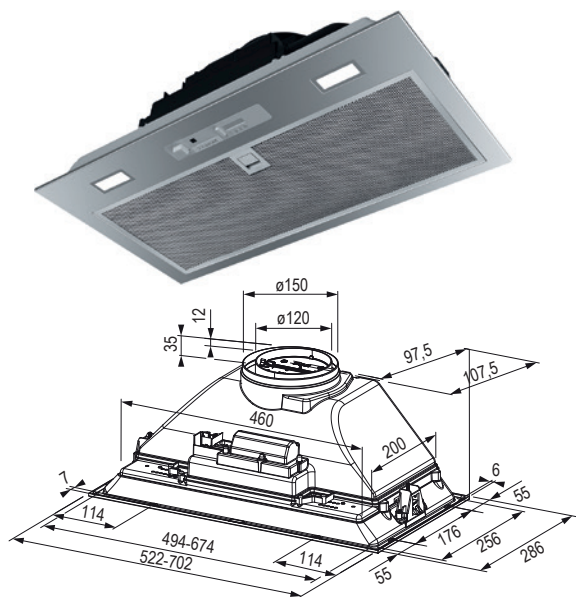

Functioning of an inclined
chimney kitchen hood

Recirculation

- Most Franke kitchen hoods can also be used for recirculation when the filtered air goes back to the room.
- Activated charcoal odour absorbing filters are not included in the delivery (unless stated otherwise).
- There is also the option to purchase a long service life filter where the filter can be washed 5–8 times in the dishwasher.

kitchen sinks

BLANCO

Blanco
kitchen
sinks

- stainless steel
- SILGRANIT®PuraDur®
- CERAMIC PuraPlus®

Stainless steel

- due to its material properties, stainless steel fundamentally does not rust

Pura ceramic

- it is absolutely resistant to high temperatures, even long-term sunlight does not change its colour or structure

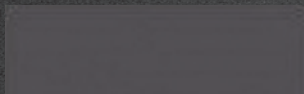

Silgranit

- has a natural resistance to common household acids (such as vinegar or citric acid), and is resistant to stains that can occur from e.g. coffee or certain fruits and types of vegetables
- the surface is smooth and free of pores
- this maximally prevents dirt from settling and the multiplication of bacteria

granite
kitchen sinks

- excellent composite material Silgranit® PuraDur® is characterised by the optimal balance of easy maintenance, durability, smoothness and perfectly combinable colours
- silky stone surface creates a stone character of the kitchen sink that is pleasant to touch

Main advantages of the material:

- scratch resistant
- unbreakable
- resistance to high temperatures up to 280°C
- 100% food-safe surface
- 100% acid resistance
- 100% colourfastness

waste disposers

EcoMaster Economy EVO3 for small households

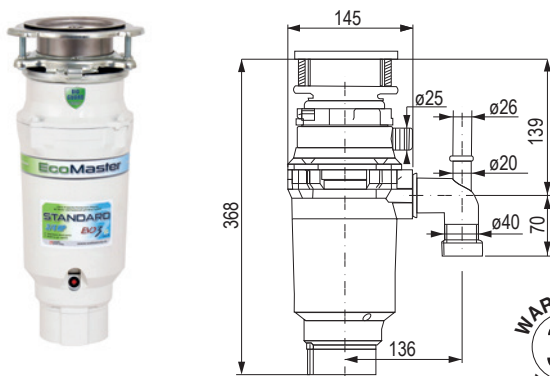

code	description
354034	1/2 HP (375 W)

- designed for small households or for places with non-standard or very tight mounting space
- all crushing components are made of stainless steel
- noise damping by covered motor

TECHNICAL INFORMATION:

- speed: 2,600 rpm
- torque: 1.5 Nm
- chamber volume: 1.48 l
- crushing segments: stainless steel, reinforced blades
- weight: 4.4 kg

EcoMaster Standard EVO3 for normal households

code	description
337729	3/4 HP (550 W)

- suitable for all normal households and in places with a lack of space under the kitchen sink
- all of its crushing components are made of stainless steel; sufficient power and motor damping

TECHNICAL INFORMATION:

- speed: 2,700 rpm
- torque: 1.8 Nm
- chamber volume: 1.48 l
- crushing segments: stainless steel, reinforced blades
- weight: 5 kg

EcoMaster Heavy Duty Plus waste disposer for demanding users

code	description
231699	3/4 HP (550 W)

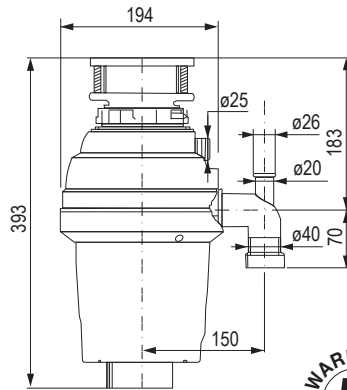

- recommended for all households
- optimally combines all parameters and enhancements of more luxury models
- compared to the cheaper Standard model, it features a bigger and deeper crushing chamber, overall noise damping of the motor and chamber including insulating pad

TECHNICAL INFORMATION:

- speed: 2,700 rpm
- torque: 1.8 Nm
- chamber volume: 1.83 l
- crushing segments: stainless steel, reinforced blades
- weight: 4.9 kg

waste disposers

EcoMaster DELUXE EVO3 kitchen food waste disposer for the most demanding users

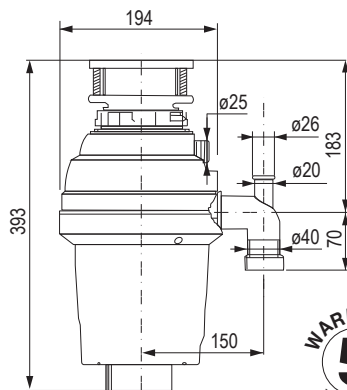

code	description
337731	3/4 HP (550 W)

- suitable for larger households
- a great choice for those who do not like compromises and enjoy luxuriousness
- from a technical point of view, this waste disposer delivers perfection to all elements in the smallest detail
- compared to cheaper models, it has the biggest crushing chamber, the best overall noise damping of the chamber and motor
- the crushing ring is higher and, in addition, equipped with a double row of perforations for faster and finer crushing

TECHNICAL INFORMATION:

- speed: 2,700 rpm
- torque: 1.8 Nm
- chamber volume: 1.9 l
- crushing segments: stainless steel, reinforced blades
- weight: 5.7 kg

EcoMaster LCD EVO3 kitchen food waste disposer for catering facilities

code	description
337734	1 HP (750 W)

- for medium-demanding commercial facilities with a frequency of 200 to 300 meals per hour
- kitchens, restaurants, schools, hospitals, retirement homes, congregate care facilities, canteens

TECHNICAL INFORMATION:

- speed: 2,800 rpm
- torque: 2 Nm
- chamber volume: 1.9 l
- crushing segments: stainless steel, reinforced blades
- weight: 5.7 kg

Pneumatic switch for EcoMaster waste disposers

code	colour
367540	matt stainless steel
500886	polished chrome
500888	black matt
500889	matt white

- serves as a controller to start the waste disposer (direct connection to the waste disposer)
- standard positioning in the kitchen sink area,

same as the kitchen tap (35 mm hole)

- waste disposers can be used also without this controller (using a switch-operated electric socket)

Tubular siphon for EcoMaster waste disposers

code	description
231705	plastic

- recommended for faultless assembly of waste disposer

Hose for EcoMaster pneumatic switch

code	description
500890	air hose approx. 1 m

- the hose of the pneumatic switch is designed to be connected directly to the waste disposer
- together with the button is used to control the waste disposer
- air hose approx. 1 m
