

NEW

StrongMax to the max

Even small improvements lead to maximum performance.

That's why we are constantly refining and fine-tuning our products. We have just made a change to the StrongMax slides. Small details that make the job easier.

- 1 The drawer removal mechanism used to be released from the side, which takes a fair bit of gymnastics with wide drawers. On the new model, it is released more conveniently from the front. You won't get quite as much of a stretch, but the job will be that bit more pleasant.
- 2 The stronger base support on the new StrongMax 2026 model holds the base of wide drawers more firmly and makes it more rigid. And that's not to be sniffed at either.

With these steps, we are gradually building StrongMax up to the max... max performance, max satisfaction.

StrongMax 2026

Both models will be on sale for some time, and you may come across both in a single job. **The fittings are identical in appearance, dimensions, colour and function. The cutting dimensions also remain the same.** However, they differ in the way they attach to the slide and are not interchangeable. To help you tell them apart easily, we supply them in different packaging. Please bear this in mind during assembly.

All for the furniture making
